The next 25 years of LTER: Contributions to understanding ecological change

Thanks for a great 2006 ASM!

Welcome LTER Scientists:

In 2006, the All Scientists Meeting will return to the YMCA of the Rockies in Estes Park, Colorado, a venue that has been used for two very successful LTER All Scientists Meetings.

The meeting will take place from the evening of September 20 through the afternoon of September 23.

The Program Committee has developed a program for the meeting in consultation with relevant LTER interest groups and the LTER Coordinating Committee.

The program includes three plenary speakers (Pamela Matson, Steve Carpenter, Ed Barbier), representatives of the National Science Foundation, evening presentations on the history of LTER (John Magnuson) and the Trends book (Debra Peters), a full day devoted to Research Planning, around 50 other working groups, space for approximately 500 posters, an evening mixer focused on site research, field trips to the Niwot and Shortgrass Steppe LTER sites, and meetings of the Information Management, Graduate Student, Education, International, and Coordinating Committees.

Logistics for the meeting are being handled by the LTER Network Office in collaboration with The Schneider Group, a company specializing in meeting organization.
